TIE-DOWN STRAPPING

We supply a complete range of Narrow Fabrics including knitted and woven elastics, braided products and webbings. We offer a Unique Service Offering in the form of Bespoke Branding. This allows us to offer branded products to our clients, hence affording our clients the opportunity to market their brand even after their finished product leaves their Warehouse.

Our R & D, Test Facilities and After Sales Services sets us apart in the market. We are confident that we can add value to your business and offer Cost-Effective Innovate Solutions.

Oriented or Tensilized Polyester & Polypropylene are the strongest plastic Strapping Products and are used as a viable alternative to Steel Strapping. Polyester provides excellent retained tension on rigid loads. It's excellent recovery properties help a load absorb impact without strap breakage.

Polyester Strapping shows excellent resistance to moisture and is most suited for Outdoor Applications. It has become the preferred strapping method for High Value Cargo as Polyester will not Score, Scratch or Damage any Metal or Painted Surface.

Due to the Physical Make-Up of Polyester, it makes for an ideal consumable that is quite easily recyclable. As companies are becoming more Brand Conscious, we have equipped ourselves to offer a **1-STOP-SHOP** to our clients. We can brand and dye any strapping to the Individual Client's Requirements, hence allowing our clients to set themselves apart in the market.

AIRCONDITIONING

The Njabulo Airconditioning team started in 2006 with its first major installation at Eskom - Camden Power Station.

HOT PROMO
12000BTU
INSTALLED FROM R6949
